2019-2023  
**Minor Specialized in Data Science And AI**

## PROJECTS

### • Breathing sound binary classifier (January 2022)

In this, we are classifying Breathing sounds into Healthy and unhealthy using ANN.

### • Disease Identification (May 2022)

**Mentor: Dr. Sulabh Bansal**

In this, we are using 3 different machine learning models to Predict the disease based on 5 symptoms given by the user. And to enhance it, we have used Python GUI.

## SKILLS

- Machine Learning
- Python
- Java
- C
- C++
- Data Structures and Algorithms
- SQL

# Work Experience

- Advanced Microdevices (AMD)
  - Worked in The Global Support Team.
  - My Job was to help the new recruits with all the IT things.
  - Also to look after the issues faced by them with their systems.
